Be part of the solution

The Clean Solution

What your business can do

CITY OF LONG BEACH

Keeping it clean. It's good for the community. It's good for business.

By taking the initiative against stormdrain pollution, you send a positive environmental message to both your community and your clients, thereby enhancing your corporate image. You may even gain valuable public relations exposure along the way. So be part of the solution and make a positive impact on the community, our waterway and your bottom line.

What are stormdrains and what is storm drain runoff?

Stormdrains collect the excess water that gathers on our streets and divert it via a series of underground pipes and tunnels to our waterways - lakes, rivers and oceans. Unlike the sewer system, stormdrains typically do not route the water through a treatment facility. Therefore, the water that ultimately drains to our waterways is often polluted and carries with it all the cleaning chemicals, pesticides, fertilizers, manufacturing byproducts and other debris that washes off your businesses' property. The impact on the environment is severe and jeopardizes our wildlife, fishing, recreation, tourism and our health.

Cleaner stormdrains.

It's not just your responsibility, it's the law.

We all have an obligation to keep our waterways clean by preventing stormdrain pollution. The federal Clean Water Act mandates that our lakes, rivers and oceans be safe enough to swim in and support wildlife. Compliance doesn't always have to be a costly undertaking. In fact, there are a number of simple yet effective solutions your business can take to alleviate stormdrain pollution and contribute to the health of our waterways.

The resources you need to make a difference.

Stormdrain pollution affects everyone, which is why we have to work together to be part of the solution. To help you do your part, we've created a number of useful resources to guide and instruct you in your own efforts. And whether you're a manufacturer, restaurateur or landscaper, these materials will provide you with the answers and guidance you need.
